Professional Summary

Web developer with hands-on experience building full-stack applications using Vue.js, Inertia.js, and Laravel. Comfortable working across frontend and backend layers. Focused on writing clean, maintainable code.

Technical Skills

Laravel • Vue.js • Inertia.js • JavaScript (ES6+) • TypeScript • HTML/CSS • REST APIs • Git • SQL • MySQL

Experience

Yenya Soft Private Limited — Software Development Intern   *Nov 2025 – Feb 2026*
Kathmandu, Nepal

- Assisted in developing and maintaining frontend features using Vue.js and backend functionality using Laravel.
- Worked on API integration, bug fixes, and feature enhancements across multiple internal projects.
- Collaborated with senior developers to understand application architecture and follow best practices.

Freelance Frontend Developer   *Jan 2025 – Apr 2025*
Remote

- Maintained and enhanced a Vue.js-based dashboard application, resolving low- to medium-complexity development tickets.
- helped in initial migration of vue 2 code to vue 3 code .

Projects

Machhapuchchhre Capital Limited
Yenyasoft Private Limited
A full-stack web application for a capital limited company using Vue.js for the frontend and admin dashboard, and Laravel for the RESTful API. The system followed a headless CMS architecture where the public website consumed content dynamically from the API, and the dashboard allowed administrators to manage content through CRUD operations.
Technologies: Vue.js, Laravel, Mysql

Interest Discovery Platform
BIM 6TH SEMESTER
Interest based platform is a system for providing our users with personalized feed only specific to user interests while also providing them authority to keep unwanted content out of their feed. The system predicts user's interests by monitoring their interactions (posts, likes and comments) within the platform along with classifying the posts to various topics and genres. This system is available as a web application.
Technologies: Vue.js, Inertia.js, Laravel, FastAPI

EstateInsight
BIM 6TH SEMESTER
A real estate listing and analysis platform providing property valuation and city-level insights to support informed decision-making.
Technologies: Vue.js, Inertia.js, Laravel, FastAPI

Education

Tribhuvan University   *Apr 2022 – Apr 2026 (Expected)*
Bachelor's Degree in Information Management
Uniglobe SS/College   *Aug 2019 – Oct 2021*
High School Diploma (NEB)
